

FEBRUARY

Sidewalks, Streets and Alleys and Traffic Islands

- 2) Beautification of streets with exposed shoulders. Serisa Lepes-
destria, shore juniper, or ivy are three materials that can be
used to cover exposed soil.
- 3) Beautification of traffic islands: At intersections where terrain
makes planting possible, low, groundhugging plants such as pfitzer
or shore junipers are recommended. At intersections where planting
is not feasible, landscaping might be accomplished through the use
of small rocks, boulders, and small artificial plants such as fern.
- 4) General clean-up:
Removal of trash, garbage, debris and cutting of grass and weeds.
- 5) General commercial service area clean-up.
